Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

docketing@oshaliang.com
buta@oshaliang.com

Office Action Summary

Application No.

10/565,566

Applicant(s)

TAKAGI ET AL.

Examiner

Jeffrey O'Brien

Art Unit

3677

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 October 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO/SB/CD)
Paper No(s)/Mail Date _____
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date _____
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: _____

DETAILED ACTION

Claim Objections

1. Claims 1-3 are objected to because of the following informalities: the "plurality of end face cams" indicated in the claims do not appear to be separate cams, but instead two profiled surfaces of a single cam member. As such, Examiner requests that this language be changed to "a plurality of end face cam surfaces" throughout the claims and specification, as no special definition of "cam" is given. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Minami et al ("Minami", U.S. Patent No. 6,886,221).

Minami discloses a hinge apparatus comprising a first hinge member (12) and a second hinge member (25) turnably connected to the first hinge member, a movable member (14) arranged on a turning axial line of the first and second hinge members in such a manner as to be turnable about the turning axial line and movable in the direction of the turning axial line (Figs. 1-7B). Biasing means (3) are adapted to bias the

Art Unit: 3677

movable member (14) toward the first hinge member (12). The first hinge member and the movable member have confronting surfaces (Figs. 5A-7B). One of the confronting surfaces is provided a plurality of end face cams (upper surface of movable member 14 that faces towards 12) extending in a peripheral direction about the turning axial line and equally spacedly arranged in the peripheral direction about the turning axial line (see figure below). A raised wall surface (vertical wall next to 15A) disposed between two of the end face cams that are adjacent in the peripheral direction (see figure below), a distal end portion of said raised wall surface extending toward the other of said confronting surfaces in the direction of the turning axial line. The other of the confronting surfaces of the first hinge member and the movable member (14) is provided with a pair of abutment parts (13) that are urged against the pair of end face cams (13) by the biasing force of the biasing means and co-acts with the pair of end face cams to convert the biasing force of the biasing means to a turn biasing force for turning the second hinge member (25) through the movable member (14). A recess (as seen in annotated Fig. 1) is formed a basal end portion of the raised wall surface and located at the intersection of the raised wall surface and the end face cam so as to extend into the raised wall portion in the peripheral direction about the turning axial line and arranged on an extension of the end face cam (13). The raise wall surface is located between the recess and the other of the confronting surfaces in the direction of the turning axial line (when the lowermost part of the end face cam 13 is disposed in the lowermost part of end face cams of the one of the confronting faces and a surface of the end face cam of the other one of the confronting surfaces abuts the raised wall so that

Art Unit: 3677

the face wall is between the recess and the other of the confronting surfaces in the direction of the turning axial line).

Annotated Fig. 1

4. With respect to claims 2 and 3, Minami discloses that one side surface of the recess forms part of the end face cam (see figure above). The end face cam has a length of at least 180 degrees in the peripheral direction (see figure above).

Response to Arguments

5. Applicant's arguments filed 8/11/2009 have been fully considered but they are not persuasive.

Applicant's arguments are primarily with respect to added claim limitations. For instance, the amendments requiring that there be a distal end portion of the raised wall extending toward the other of said confronting surfaces alters the interpretation of which end is the basal end. As a result, the rejection has been altered to indicate that the bottom portion of the cam adjacent the Raised Wall Surface is the recess. This altered grounds of rejection is necessitated by amendment. Examiner therefore maintains that Claims 1-3 are anticipated by Minami.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey O'Brien whose telephone number is (571)270-3655. The examiner can normally be reached on Monday through Thursday 7:30am-5:30pm EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Victor Batson can be reached on 571-272-6987. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
